the industry known as general aviation encompassing all flying outside of the military and commercial airlines dates from the early days of powered flight as technology advanced making possible smaller aircraft that could be owned and operated by civilians manufacturers emerged to serve a growing market increasingly this meant business flying as companies used aircraft in a variety of roles the industry struggled during the great depression but development continued small aircraft manufacturers became vital to the massive military production effort during world war ii after the war rapid technological advancement and a robust prosperous middle class were expected to result in a democratized civil aviation industry for many reasons this was never realized even as general aviation roles and aircraft capabilities expanded despite its many reverses and struggles entrepreneurship has remained the

driving factor of the industry

more like a roller coaster than a plane the general aviation business has soared plunged and risen again since its romantic takeoff in the lindbergh era this engaging closeup on the history and future of the general aviation industry will fascinate pilots business aviation professionals historians and aviation enthusiasts of every ilk 36 illustrations

this is a comprehensive reference to every type and manufacturer of business and light aircraft constructed in the western world since world war ii
